Board of Examiners.

Duplicate of this certificate has been recorded in the Steam Boiler Office this \_\_\_\_\_ day of \_\_\_\_\_ 190 .

Collector and President, Board of Examiners.

## APPENDIX C.

(See rule 58.)

*Examination in Rough Working Drawing for a First Class Engineer's Certificate of Competency.*

1. The regulations in regard to the qualifications of a candidate for a First Class Engineer's Certificate of Competency specify that—

“He must be able to make rough working drawings of the different parts of the engines and boilers;

“He must be able to state the general proportions borne by the principal parts of the machinery to each other.”

2. In accordance with these clauses a candidate for a first class certificate is required to make a rough working drawing of the parts specified on the other side of this leaf. A mechanic who has been some years in charge of engines and boilers ought by this time to have familiarly in his mind the general construction of at least one set of engines and boilers, say that set he was last with. Fine drawing is not expected, and in the proportions of the parts a wide margin will be allowed; absurd dimensions will be failure in practical knowledge.

[a--a] These words were inserted by G. N. No. 3522, General, dated 27th June 1905, B. G. G., 1905, Pt. I, p. 784.
